

EMu v.5

Searching records - partial match

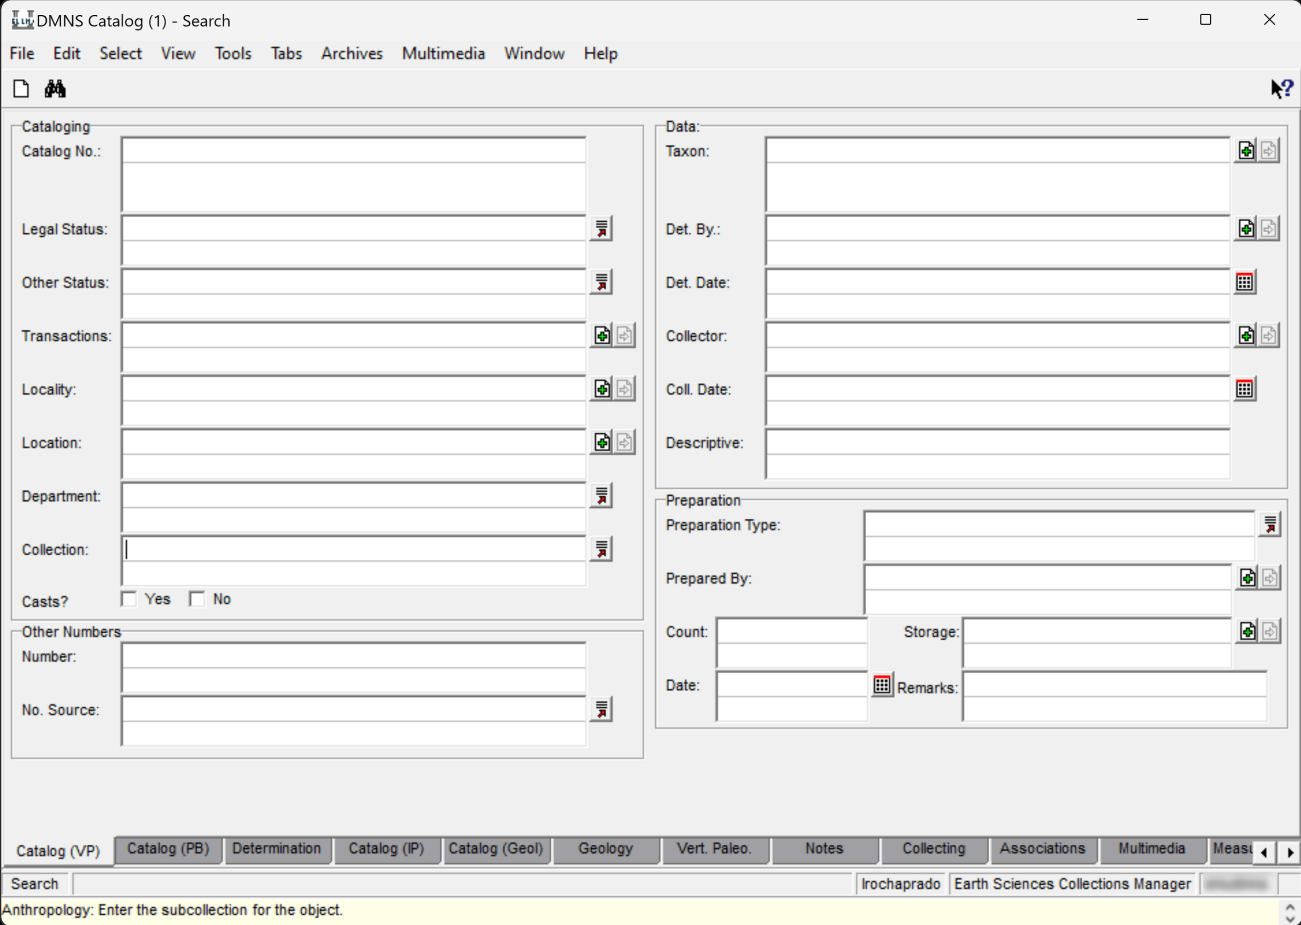

Last updated 29-01-2025

Table of contents

1 Open any module to search. Here we opened the Catalog (VP).	3
2 Click the "Collection" field text box	4
3 Type only "Ethno" in the box	5
4 Click the "Search" icon	6
5 The result is "No matching objects"	7
6 Edit the text in the the "Collection" field textbox	8
7 Click the "Search icon"	9
8 You will find a number of records	10

1 Open any module to search. Here we opened the Catalog (VP).

We are logged in as Earth Sciences Collections Manager, but we still are able to search across collections.

Search

Earth Sciences Collections Manager

Anthropology: Enter the subcollection for the object.

2 Click the "Collection" field text box

We will see if we can find the records in both the Ethnology and Ethnological Art collections.

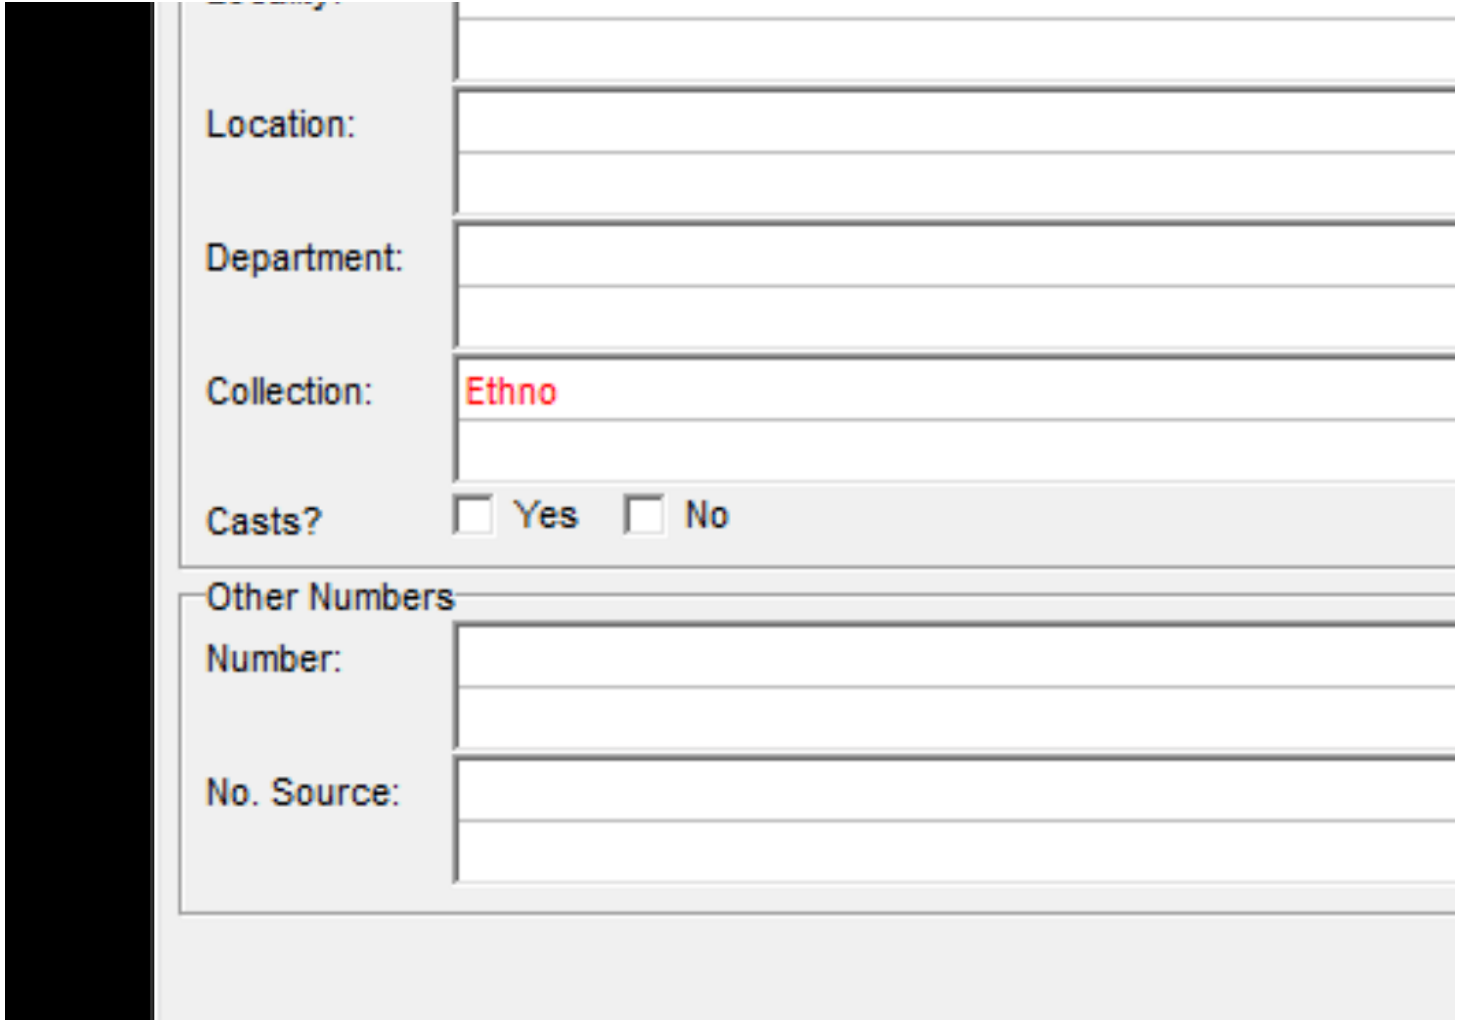

The screenshot shows a search form with the following fields and controls:

- Location:** A text input field with three rows.
- Department:** A text input field with three rows.
- Collection:** A text input field with three rows. A yellow circle highlights the first row, and a hand cursor points to it.
- Casts?** A checkbox followed by the text "Yes" and another checkbox followed by the text "No".
- Other Numbers** section:
 - Number:** A text input field with three rows.
 - No. Source:** A text input field with three rows.
- Navigation buttons:** A row of buttons at the bottom: "Catalog (VP)", "Catalog (PB)", "Determination", "Catalog (IP)", "Catalog (Geol)", and "Gen".

3 Type only "Ethno" in the box

Let's see what is the default behavior of EMu when we type parts of words.

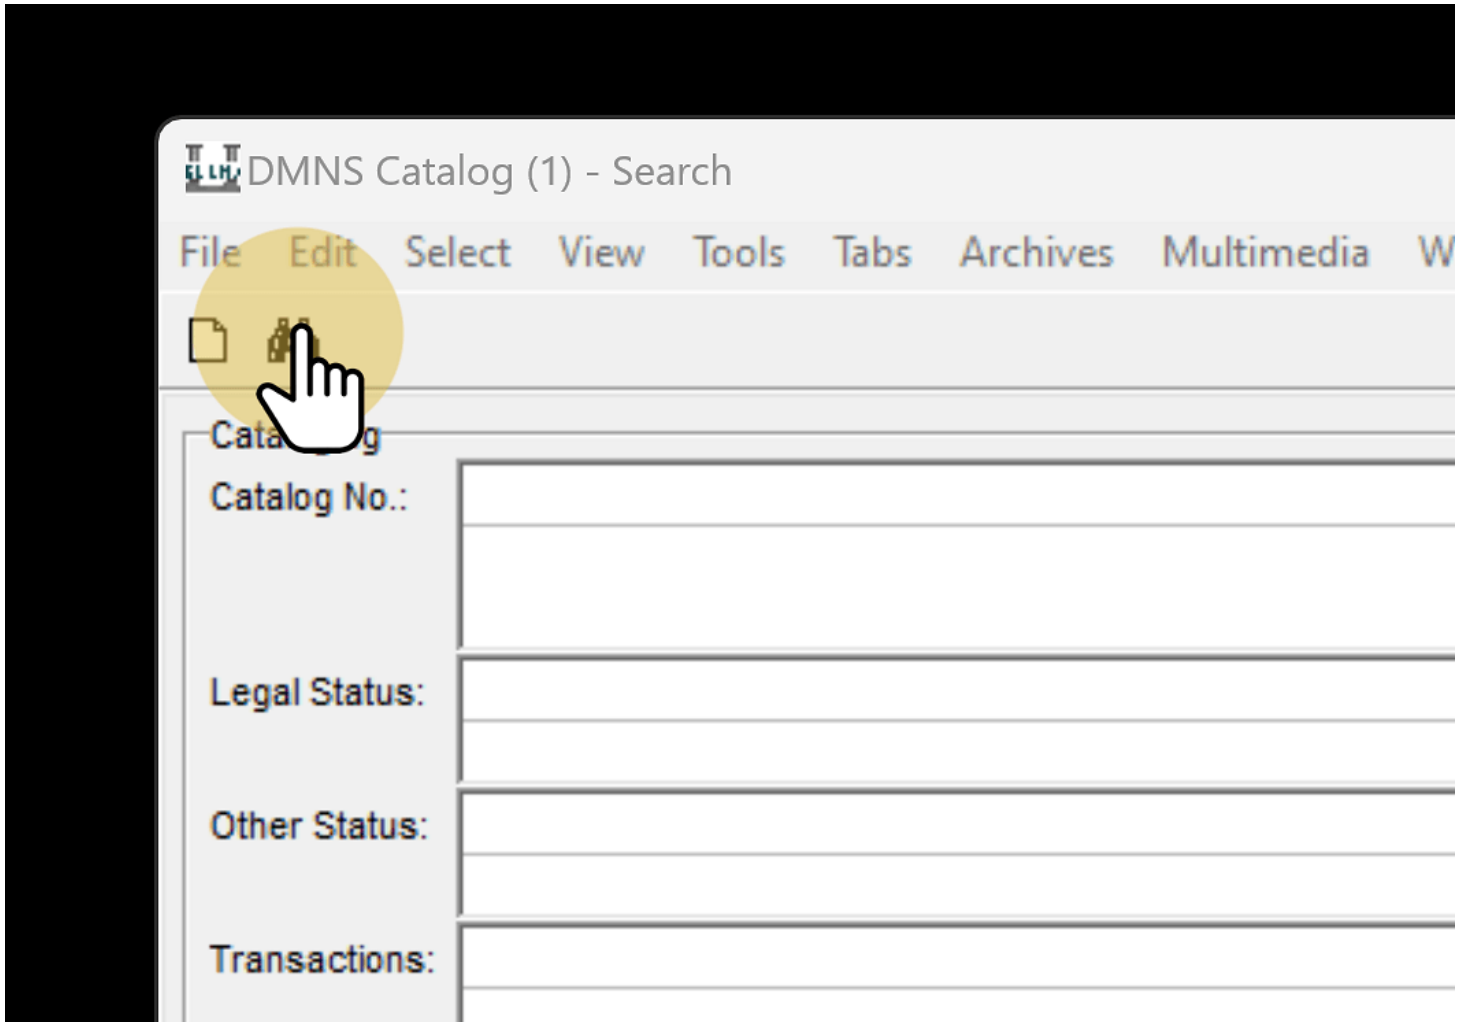

The screenshot shows a web-based form for searching records in the EMu database. The form is divided into several sections. The 'Collection' field is highlighted with the text 'Ethno' in red. The 'Casts?' field has two checkboxes, 'Yes' and 'No', both of which are unchecked. The 'Other Numbers' section includes a 'Number' field and a 'No. Source' field, both of which are empty. The form is set against a light gray background with a black sidebar on the left.

Location:	
Department:	
Collection:	Ethno
Casts?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Other Numbers	
Number:	
No. Source:	

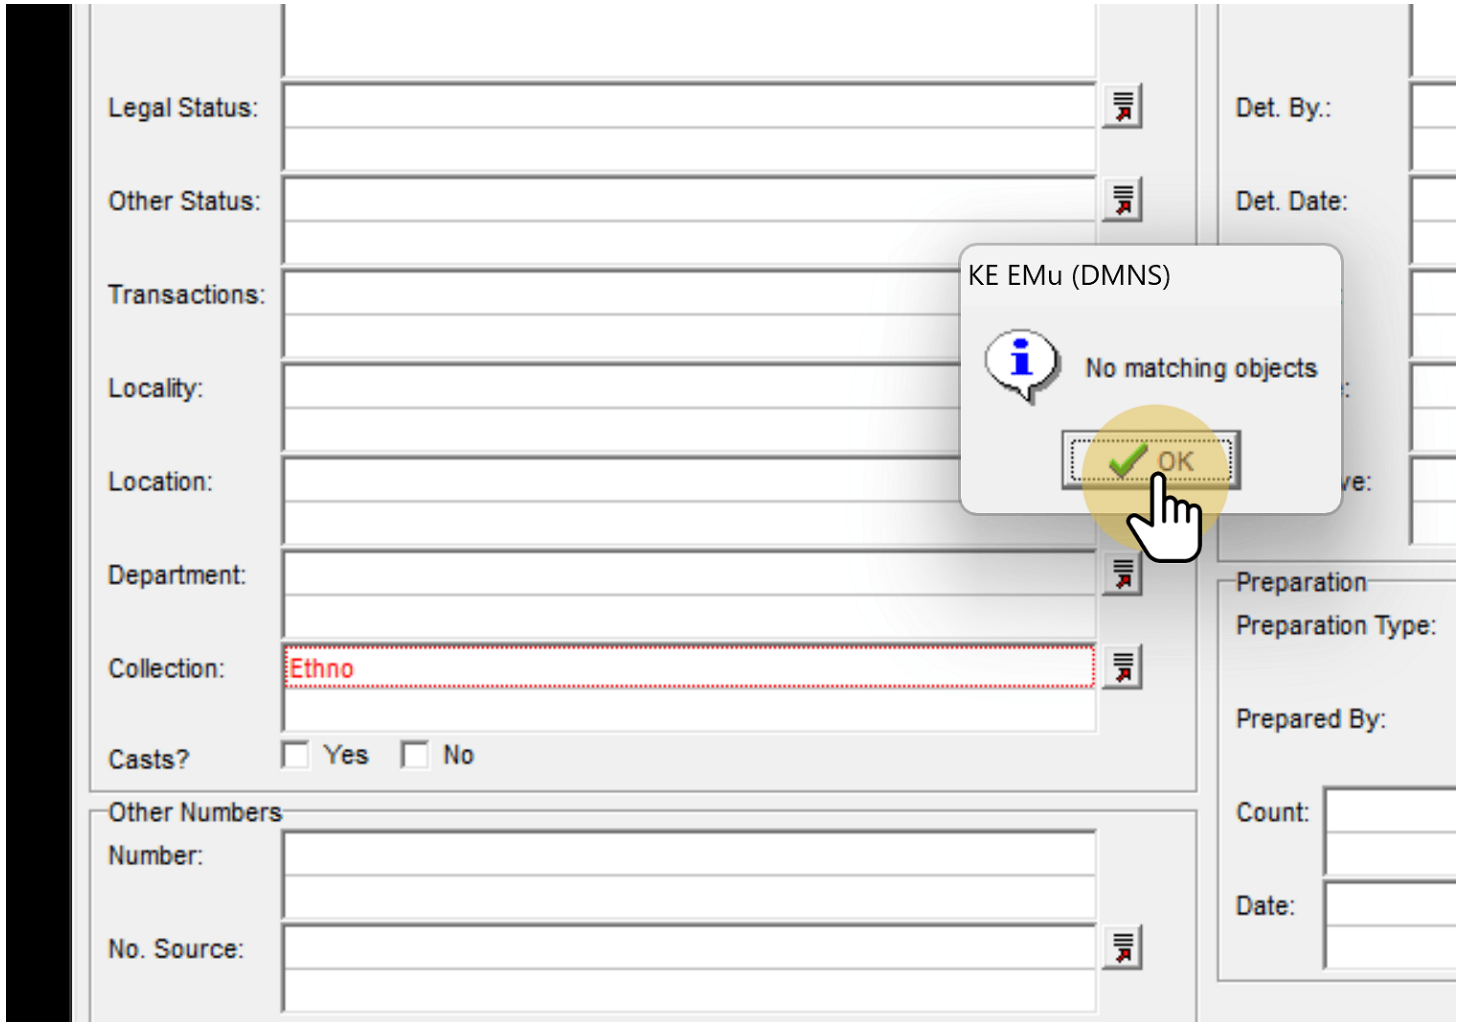

4 Click the "Search" icon

The results should return all the records in the "Ethnological Art" collection.

5 The result is "No matching objects"

No records are found in the "Ethno" collection. This means that EMu does not search for partial words by default.

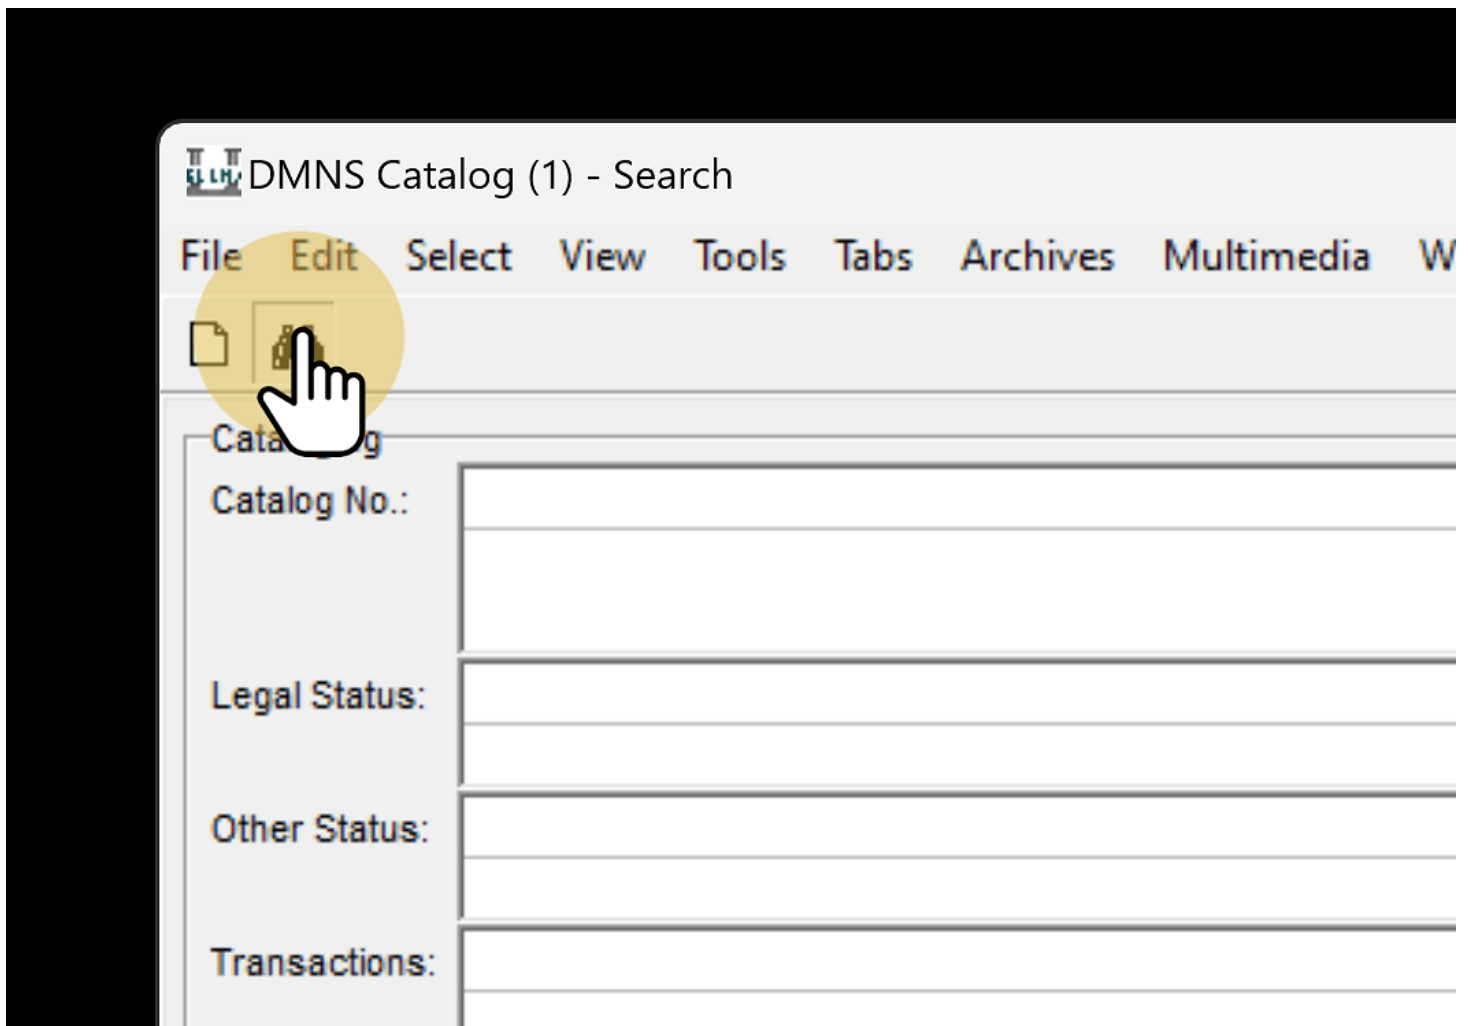

The screenshot displays the EMu (DMNS) search interface. The main search area contains several input fields: Legal Status, Other Status, Transactions, Locality, Location, Department, Collection (with 'Ethno' entered), and Casts? (with Yes and No checkboxes). To the right, there are fields for Det. By., Det. Date, Preparation Type, Prepared By, Count, and Date. A modal dialog box is overlaid on the search results, titled 'KE EMu (DMNS)'. It contains an information icon, the text 'No matching objects', and an 'OK' button with a green checkmark. A hand cursor is pointing at the 'OK' button.

6 Edit the text in the the "Collection" field textbox

To perform partial match searches, EMu uses the * characters in the position where you want the match to occur. In this example, we want to match words starting with "Ethno".

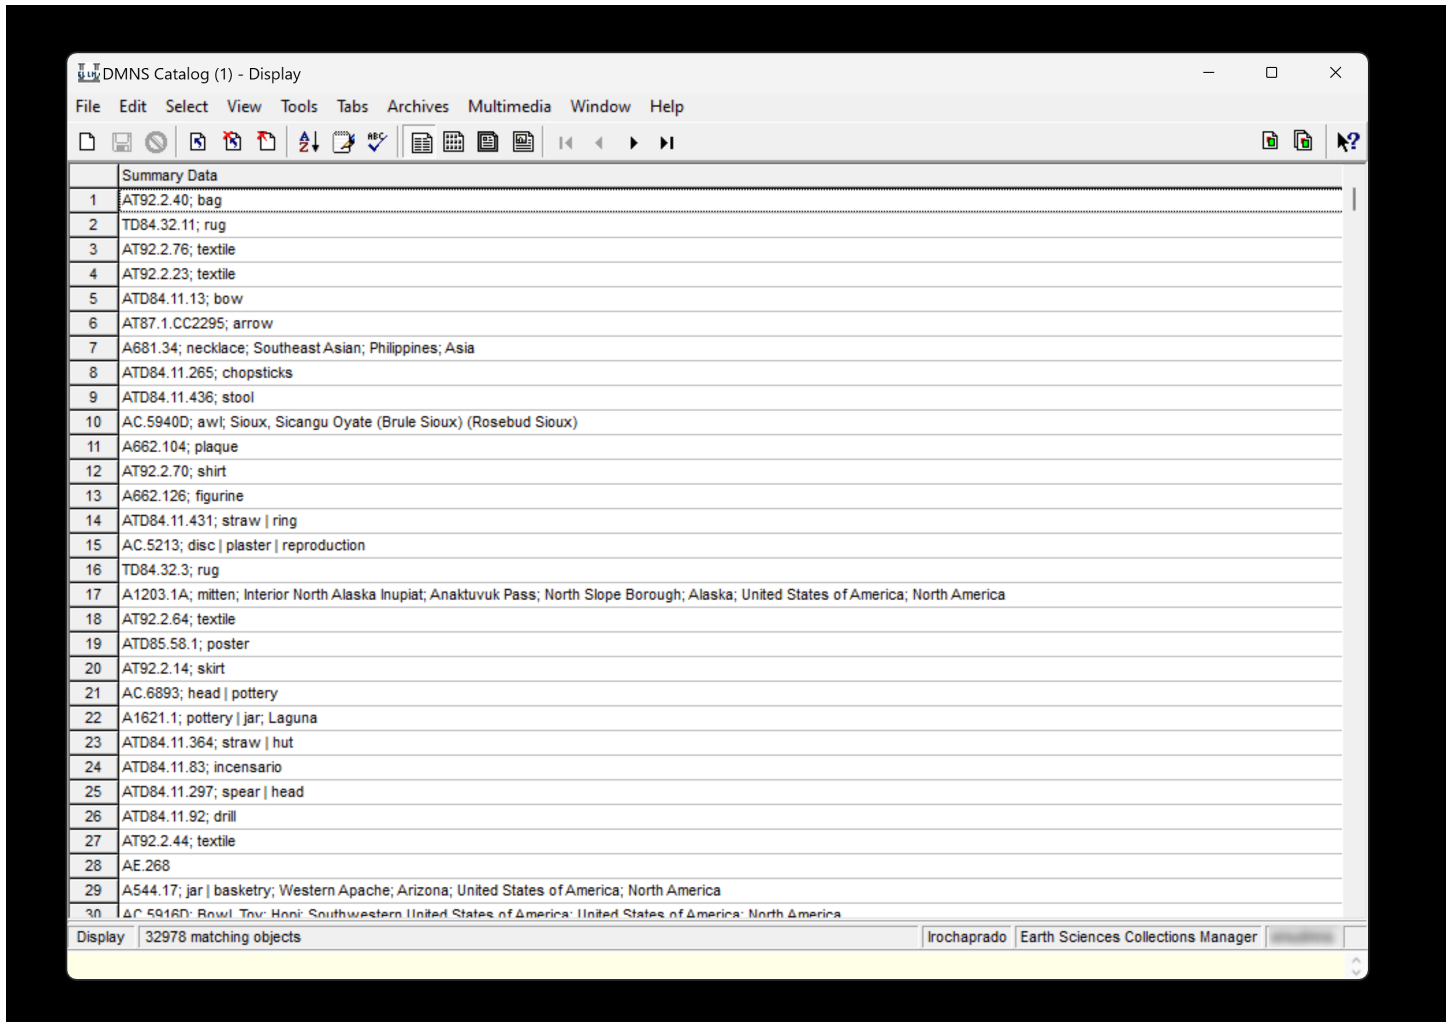

Locality:	<input type="text"/>
Location:	<input type="text"/>
Department:	<input type="text"/>
Collection:	<input type="text" value="Ethno*"/>
Casts?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Other Numbers	
Number:	<input type="text"/>
No. Source:	<input type="text"/>

7 Click the "Search icon"

8 You will find a number of records

These records are in both collections that contain "Ethno" as part of their name in the database.

	Summary Data
1	AT92.2.40; bag
2	TD84.32.11; rug
3	AT92.2.76; textile
4	AT92.2.23; textile
